

# HULL 1000 SERIES

## 1000 GALLON FUEL TRAILER

For nearly 40 years, Hull Welding has manufactured high-quality portable fuel tanks, tow rigs, skid tanks, and refueling trailers.

Save time and fuel by having your fuel on the job location ready to refuel your equipment, trucks or generators. Never worry about fuel shortages in bad weather.

DOT Compliant. All HULL trailers are DOT compliant. Our tanks are welded to each trailer so they can be towed on virtually any terrain. Tow to your work sites that require fuel transportation across highways. They can be easily towed and moved quickly to fuel machinery, vehicles, generators, and other equipment.

Having a mobile fueling unit is essential to keeping the construction or job on schedule. It may be necessary to move fueling sources to another part of the work site to refuel equipment or aviation.

A towable fueling trailer allows for the safe movement of fuel, decreasing the risk of spills or leaks and waste.

Bring the fuel to the equipment! Whether it's for construction, aviation, forestry, farm or ranch, HULL has the fuel solution for your needs.

Be prepared for fuel shortages and extreme weather. Never run out of fuel when you can safely store and transport it to your location or equipment.

## STANDARD FEATURES

- Capacity: 1,000 gallons
- Single or Double wall (optional)
- 12 VDC 20 GPM pump 20' hose
- Trailer frame: 6" channel iron
- Total length: apx. 20'
- Fill-Rite Pump
- Fuel Filter
- Fluid level gauge
- Storage area: apx. 20" X 48"
- Tandem axle: 7,000 lb (each) – 14,000 lb total
- Brakes: both axles, break-away system
- Military type fenders
- 1" fuel Hose
- Safety chains
- Tires 4: 235/16" 14 Ply
- Bulldog Hitch: 2 5/16" ball
- Lights and wiring
- Industrial auto epoxy paint and primer
- UPC undercoating standard
- Standard colors: White, Yellow, and Green\*
- Hull's Stand & Fill hand grip
- Length 21 ft
- Width 6 ft
- Height 6ft
- Empty weight 1364.85 KG/3009 LB

## OPTIONS

- Double Wall
- Solar charged power system Battery tender 35 watt and 12 vdc deep cycle battery
- 50' hand crank Hose reel with hose
- Spring return reel with 50' of 1" hose
- Tank (made of 1/4" plate)
- Roll over bars for pump and fill protection
- Meter
- Rubber torsion axles
- Spare tire and mount
- Lunet ring
- 14 gauge Diamond Steel Tool Box
- Your custom color paint \* white, yellow, and green are standard no extra charge
